By R G K Lempfert

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Weather Science Weather science or Meteorology may be regarded as a branch of the wider science Physics, but it is a-branch which requires special methods of. Investigation. As in all sciences, the first step must be the observation and classification of the facts which have to be explained. The physicist proceeds by means of special experiments. In his laboratory he can arrange to exclude from the phenomena which he is investigating certain groups of in?uences while he gives special prominence to others. The use of this most potent weapon is denied to the meteorologist. With the possible exception of the case Of the pollution of the air Of our large towns by smoke, no efforts that man can make can in?uence the course of the weather. Like the astronomer, the meteoro logist must take things as they come. He must collect his facts by patient and laborious observation, and hope that ultimately he may be in a position to regroup and combine them so that they may enable him to find answers to the questions which confront him.
