TRANSACTIONS OF THE INSTITUTION OF CIVIL ENGINEERS OF IRELAND, VOL. 17: FIFTY-FIRST SESSION, TO JUNE, 1886 (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Transactions of the Institution of Civil Engineers of Ireland, Vol. 17: Fifty-First Session, to June, 1886 It is somewhat remarkable that the experience of Mallet, in France, who has long been in the habit of using the compound locomotive with two cylinders, and of Herr Von Borries, in Germany, should not have earlier led to the introduction of the system into England, when both these authorities claimed an economy of from 18 to 20 per cent. A leading bogie for passenger locomotives has now become almost universal, those railways who do not use it having in most cases adopted some form of radial axle-box, so as to ensure the necessary amount of flexibility in the wheel base. For branch lines and suburban traffic a tank engine having four wheels coupled with a radial axle-box in front and one behind is now not at all uncommon. The adoption of the bogie truck for carriages which the Americans have used so long has been gradually extended since the introduction of the Pullman cars on the Midland Railway, and though the American pattern of body, with a central passage, has not been copied, the bogie has found the greatest favour, and there are hardly any of the larger companies which do not build a proportion of their stock with bogies.
